

Additional License Authorizations

For Host Connectivity software products

Products and Suites covered

This Additional License Authorizations document (“ALA”) set forth the applicable License Options and additional specific software license terms that govern the authorized use of the software products specified below, and are part of the applicable agreement (i.e., End User License Agreement; and/or any separate agreement that grants Licensee a license to such products, e.g., Master Agreement and/or Quotation) (the “Applicable Agreement”). Capitalized terms used but not defined herein shall have the meanings set forth in the Applicable Agreement.

** Additional licenses solely for non-production use, may be available as specified in the Non-Production Licensing Guide found at <https://www.rocketsoftware.com/company/trust/agreements>. Any such non-production licenses will be subject to the Non-Production Licensing Guide and the applicable License Option terms and conditions set forth in this ALA.

Exceptions to Terms of the Rocket End User License Agreement for above Products

Notwithstanding any provision to the contrary in Section 1.2 of the Rocket End User License Agreement, the Evaluation Term for all Products covered by this ALA is 60 days, unless otherwise set forth in an applicable Order Form or a separate evaluation agreement.

Notwithstanding the restriction set forth in Section 1.1.4 (iii), the Products covered by this ALA are not restricted to use in the country set forth on the Order Form or where the Products were first installed unless otherwise set forth in this ALA. Products must still be used in compliance with export control laws and may not be used in countries where prohibited by law.

Definitions

Term	Definition
Add-On Software	Means software that installs on top of Prerequisite Product.
Associated Product	Means a Rocket Software product that is used in conjunction with another Rocket Software product.
Authorized Alternative	A legacy Rocket Software product with a different name than another Rocket Software product, but with similar core functionality, that Rocket Software may allow Licensee to use as an Authorized Alternative or back-grade product for a limited period of time. More detail on this term is provided under Additional License Terms on Page 31.
Bot	Means a robotic software entity that performs work, driven by automation software.
Concurrent Users	Means individual(s) who, at the same point in time, are actively using any Device or other software program that may access the Licensed Software either directly, or indirectly through any other software program, regardless of how such access occurs or if such user uses any hardware or software that reduces the apparent number of users who are using the Licensed Software, such as by using a terminal service.
Container	Means the running software instance that emulates an active OS Instance or wraps an application under control of a technology including but not limited to Docker.

Device	Means, without limitation, a laptop, tablet, desktop, workstation, portable storage device, as a streamed application, or a Virtual Machine. In general, and by way of example only, a Device includes any current or future technology which combines an operating system and interactive facilities (such as keyboard and screen) to support human end user operation of the Licensed Software.
Distributed Application	Means software with various components that can be installed and run on multiple computers (clients and servers) within a network to solve specific computing problems.
Domain Control Components	Means the software components that are intended to support operation of the Reflection X Advantage ("RXA") software as a Distributed Application.
E-LTU and E-Media	Means products which are electronically delivered only, and as such any reference to FOB Destination or delivery methods that are stated on your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
Expanded Usage Right	Grants licensee additional usage rights that the standard product license terms prohibit.
Host Connection	Means a single network connection between a Device or Server and a host system.
Middleware	Means software that runs on a Server that provides Unattended Services to other applications.
MSS Metering Component	Means the capability in Host Access Management and Security Server that allows the administrator to monitor usage.
Named User	Means a specific human individual able to access or use the Licensed Software regardless of whether they actually access or use the Licensed Software.
PKI Manager	Means the Reflection PKI Services Manager software.
Prerequisite Product	Means a product for which licenses must be acquired separately from the add-on product that requires it. By way of example, Reflection Desktop is a prerequisite product for the Reflection Desktop for NonStop Add-On.
Primary User	Means the person who uses a Device more than any other User of that same Device.
Print Server	Means a device with the Licensed Software installed that is running multiple host printer emulation sessions that service multiple terminal emulation sessions not concurrently running on that same device running the printer sessions. Users on client devices use these terminal sessions to route print jobs through the printer sessions on the server for the purpose of printing host print jobs to a locally attached or network printer.
Robotic Process Automation or RPA	Means operation by a Bot or robotic process automation software program, application, or user.
RPA Program	A development tool and associated run-time software that uses automation to orchestrate the exchange of data between applications to complete a business process.
RXA Domain Control Components	Means RXA Administrative Console, Reflection X Service, RXA Client Connector that are used in domain/distributed mode.
Server	Means a single logical partition, Virtual Machine, or instance of a server operating system.
Storage Device	Means a subset of Devices that are responsible for shared storage capabilities, representing addressable entity, physical, virtual, or cloud, including but not limited to storage arrays, network accessible storage (NAS) and other infrastructure.
Suite	Means a product suite comprised of two or more component products.
Unattended Services	Means automation of the Licensed software without the continuous interaction of a human end user with the Licensed Software for the entire duration of a task or process.
User	Means the human/person that uses the software.

Rocket Software Global Headquarters

📍 77 Fourth Avenue
Waltham, MA 02451 USA
📞 US: +1 781 577 4323

Virtual Machine

Means a computer that does not physically exist but is simulated by another computer.

License Options

The following License Options are the types of licenses available for a given software product as further specified in this ALA. The applicable License Option for a license shall be as set forth in the Applicable Agreement or Order Form. Those products with only one License Option available shall be governed by such License Option whether or not stated in the Applicable Agreement or Order Form unless otherwise agreed in writing between Licensee and Licensor.

Perpetual License A “Perpetual License” is a License whose term is perpetual, meaning that the duration is indefinite for so long as the Agreement is in force. Except as otherwise stated and until such time that End User Customer advises Rocket that End User Customer no longer uses the Products, and provided that End User Customer is up to date with the payment of any fees due in accordance with the Agreement, Rocket shall make License keys or passwords available to End User Customer for so long as the Agreement remains in force. If a License key expires, Rocket will make available a renewal License key approximately one month before the expiration of a current License key. It is End User Customer’s responsibility to update Rocket with any changes to the designated contact for receipt of License keys. After the first Maintenance term, and provided all fees due under the Agreement, including, without limitation, any applicable License upgrade fees, are paid in full, End User Customer may elect to cancel Support Services and retain the right to use the Products in accordance with the terms and conditions of the Agreement, subject to section entitled “All-or-none Support Services”. If End User Customer elects to cancel Support Services, End User Customer shall notify Rocket in writing at least 90 days prior to the renewal date, and End User Customer (i) shall not be entitled to a refund of any fees which are due and payable under the Agreement or which have been paid, and (ii) shall not be entitled to receive any rights provided for in the Agreement related to Support Services including, without limitation, customer support desk, error corrections, enhancements, improvements and updates. Should End User Customer fail to provide the aforementioned notice, the annual Support Services fee shall be due and payable by End User Customer to Rocket. End User Customer may elect to reinstate Support Services by paying all Support Services fees that would have been due had End User Customer not canceled Support Services, in addition to the Support Services fee for the then-current Support Services period, plus a reinstatement fee.

Subscription License A “Subscription License” is a License whose term is set for a specific period of time as set forth on an Order Form (“Subscription Period”). Once the Subscription Period expires, End User Customer has no further rights to use the Products and the End User Customer must uninstall the Product from the environment in which it has been installed. Subscription Licenses include Support Services as part of the Subscription License fee.

Concurrent User License

Licensed Software provided under this License Option gives Licensee the right to install or access the Licensed Software on multiple host Devices or Servers, or one or more Containers on such host Devices or Servers, for use solely by the maximum number of Concurrent Users expressly authorized by Licensor in the Order Form for such license for whom Licensee has paid the applicable license fee. Licensee must employ a method to control, monitor, and provide reports on concurrent usage.

Except where otherwise specified in the Software Specific Terms, Licensed Software may not be installed and used for Unattended Services, including Middleware and Print Server.

Desktop License

Licensed Software provided under this License Option gives Licensee the right to install the Licensed Software on the storage of a single Device. Each additional Device that at any time has the Licensed Software loaded in its permanent or temporary memory, and each additional device through which any portion of the Licensed Software could be accessed or used by a User, requires an additional Desktop License, with the exception that the Primary User of a licensed Device may, under that same Desktop License and not simultaneously, use any Device to operate such licensed Device remotely. Licensee may transfer a Desktop License to a different device, provided that the product is completely uninstalled from the original source device before being installed on the device the license is being transferred to, and as long as the quantity deployed doesn't exceed the entitled licensed quantity.

Licensee may create copies of the Licensed Software on Server computers for the sole purpose of installation on licensed Devices, and such copies will not consume

license count.

Except where otherwise specified in the Software Specific Terms of this ALA, Licensed Software may not be installed and used for Unattended Services, including Middleware and Print Server. Licensee may not (i) install the Licensed Software on any networked Server Device that allows more than one user to use a copy of the Licensed Software, except for the limited purposes of installation on licensed Devices or multiple users that use the same Device in shifts and not at the same time, or (ii) use or install the Licensed Software in a Windows Remote Desktop Services (formerly Terminal Services), Citrix Server, Virtual Desktop Infrastructure, or Container.

Host Session License

Licensed Software provided under this License Option gives Licensee the right to configure the software to utilize a single Host Connection.

Named User License

Licensed Software provided under this License Option gives Licensee the right to install or access the Licensed Software on multiple Devices or Servers, or one or more Containers on such multiple Devices or Servers. Each such Named User has the right to unlimited access to the Licensed Software deployed on multiple Servers or other Devices. A Named User License is required for each Named User that is able to access or use an installation of the Licensed Software, regardless of whether they actually access or use the Licensed Software. Licensee must monitor and control deployment so that the ability to access or use the Licensed Software is restricted to no more than the licensed Named Users. Licensor reserves the right at any time to require Licensee to provide a list of the Named Users. Licensee may change a Named User provided that the change is made either (i) permanently, or (ii) temporarily to accommodate the use of the Licensed Software by a temporary User while the Named User is absent, but in each case no more than once every 30 days.

Except where otherwise specified in the Software Specific Terms, Licensed Software may not be installed and used for Unattended Services, including Middleware and Print Server.

Robotic Process Automation License

A Robotic Process Automation License is required for each Bot that uses the Licensed Software for Unattended Services.

Server License

Licensed Software provided under this License Option gives Licensee the right to install one copy of the Licensed Software on a single Server.

Server License (Processor Based) License

Licensed Software provided under this License Option gives Licensee the right to install the Licensed Software on any number of Devices or Servers (and connect any number of clients to such Servers) for connection to a single partition, Container, or Virtual Machine on a host system with the same type of processor specified for the license in the applicable Order Form (e.g., P10, P40, etc.).

Software Specific Terms

EnterpriseLink (all variants)

The following License Options apply: Named User License, Concurrent User License, Concurrent (Standard) License, or Server License (Concurrent Users).

Concurrent (Standard) License and Server License (Concurrent Users) License are equivalent to Concurrent User license.

Extra! X-treme; Extra! 6530 Client Option

The following License Options apply: Desktop license, Named User license, Concurrent User license, or Robotic Process Automation license.

Host Access Analyzer

The following License Options apply: Named User License, Client Access License (see below).

Host Access Analyzer (“HAA”) includes management, metering, security, and administrative tools for managing the deployment and operation of certain separately-licensed host-access functionality as used by end users operating Rocket Software or competitive products (typically, emulation products). Licensee may install and use the Licensed Software only in support of such operation of such products that you have separately licensed.

CLIENT ACCESS LICENSE: Licensee must acquire and dedicate (i) a Client Access License for each HAA User combination of Device (including virtual machines) and Named User reporting to the Server monitoring through which HAA User operates any HAA functionality and (ii) a HAA licensed unit for each additional endpoint device having (at any time) a locally-installed copy of any HAA component.

SERVER COMPONENTS: Host Access Analyzer is based on a server architecture. Licensee can deploy any server components on several physical or virtual servers for production or non-production purposes IF Licensee owns valid Client Access License. Once the subscription expires, Licensee **MUST** uninstall all server components.

Host Access for the Cloud; Host Access for the Cloud Airlines Edition and Host Access for the Cloud Unisys Edition

The following License Options apply: Named User License, Concurrent User License.

Host Access for the cloud includes the following components (“Server Components”):

- Host Access Management and Security Server (MSS)
- Host Access for the Cloud Session Server (Session Server)

Installation of the Server Components may be on multiple Servers with the following limitations:

- Server components should be installed according to the product documentation to support the quantity of users and sessions.

Licensee must install and use the MSS Metering Component.

PKI Manager is intended to support operation of the Licensed Software as a Distributed Application. Licensee may deploy the PKI Manager to Servers and Devices as appropriate to Licensee’s operating environment, for the sole purpose of supporting (i) the Licensed

Software and/or (ii) any other Rocket Software product having its own PKI Manager entitlement, and such deployment will not consume license count.

Host Access for the Cloud Robotic Process Automation Add-On

The following License Options apply: Robotic Process Automation License.

Host Access Management and Security Server (MSS)

The following License Options apply: Server License.

Host Access Management and Security Server includes the following components (“Management Components”):

- Administrative Console
- Security Proxy Server
- Metering Server
- Terminal ID Management Server

Management Components may be installed on one or more Servers. Three installations of each Management Component is allowed per license.

When Host Access Management and Security Server is included with a license for Reflection for the Web or Host Access Cloud, then MSS must be used solely for the purpose of managing Licensee’s use of Reflection for the Web or Host Access Cloud and not as a standalone product.

PKI Manager is intended to support operation of the Licensed Software as a Distributed Application. Licensee may deploy the PKI Manager to Servers and Devices as appropriate to Licensee’s operating environment, for the sole purpose of supporting (i) the Licensed Software and/or (ii) any other Rocket Software product having its own PKI Manager entitlement, and such deployment will not consume license count.

Host Access Management and Security Server - Access License; Host Access Management and Security Server - Advanced Authentication Add-On; Host Access Management and Security Server – Automated Sign-on for

Host Access Add-on; Host Access Management and Security Server - Automated Sign-On for Mainframe Add-On; Host Access Management and Security Server - PKI Automated Sign-On Add-On; Host Access Management and Security Server - Security Proxy Add-On and Host Access Management and Security Server - Terminal ID Management Add-On

The following License Options apply: Desktop License, Named User License, or Concurrent User License.

Licensee may install and use the Licensed Software only in support of Associated Products. The License Option for the Associated Product and the Host Access Management and Security Server Access Licenses purchased must be of the same type. Licensee must acquire an Access License for each Associated Product and that Access license must correspond to the Associated Product license type. For example: If the Associated Products are operated under a Desktop License, then Licensee's MSS Functionalities licensing will be subject to the Desktop License terms of the Associated Products. Any increase in license count for an Associated Product requires an increase in MSS license count.

Host Access Management and Security Server - Advanced Authentication Add-On Bundle

The following License Options apply: Desktop License, Named User License, or Concurrent User License.

InfoConnect Airlines Gateway

The following License Options apply: Server License.

The Licensed Software may be used solely in conjunction with Rocket Software InfoConnect desktop software (separately licensed). Licensee must acquire licenses for both the Server installations of InfoConnect Airlines Gateway and for the terminal address

connections used by InfoConnect Airlines Gateway.

Rocket Software Global Headquarters

77 Fourth Avenue
Waltham, MA 02451 USA
US: +1 781 577 4323

InfoConnect Desktop Pro for Airlines PTR Premium Add-On and InfoConnect Enterprise Edition for Airlines PTR Premium

The following License Options apply: Server License.

InfoConnect Desktop Pro for Airlines; InfoConnect Desktop Pro for Unisys; InfoConnect Desktop Pro for Unisys with X; InfoConnect Enterprise Edition for Airlines, IBM, and Open Systems and InfoConnect Enterprise Edition for Unisys, IBM, and Open Systems

The following License Options apply: Desktop License, Named User License, Concurrent User License, or Robotic Process Automation License.

When the Licensed Software is used by groups of rotating users (like gate agents at an airport), Licensee is permitted to have software installed on a total number of Devices at any one time that does not exceed the number of licenses owned.

Licensee may deploy the Domain Control Components to Servers and Devices as appropriate to Licensee's operating environment, for the sole purpose of supporting the Licensed Software, and such deployment will not consume license count.

PKI Manager is intended to support operation of the Licensed Software as a Distributed Application. Licensee may deploy the PKI Manager to Servers and Devices as appropriate to Licensee's operating environment, for the sole purpose of supporting (i) the Licensed Software and/or (ii) any other Rocket Software product having its own PKI Manager entitlement, and such deployment will not consume license count.

OnWeb (all variants)

The following License Options apply: Server License, Server License (Concurrent Users), User License (Authorized Users), Authorized User (Workstation) License, or User License (Processor Based).

Licensee may not transfer, ship or use the Licensed Software outside the continent in which it was originally licensed to Licensee without first paying Licensor any applicable additional fees required by Licensor. For purposes of the foregoing, "continent" shall mean North America, South America, Europe, Africa, Asia, Australia, or Antarctica.

Rocket Software Global Headquarters

77 Fourth Avenue
Waltham, MA 02451 USA
US: +1 781 577 4323

User License (Authorized Users) License is equivalent to Desktop License. Authorized User (Workstation) License is equivalent to Desktop License.

Server License (Concurrent Users) License is equivalent to Concurrent User License.

User License (Processor Based) License is equivalent to Server License (Processor Based) License.

RDE Visual Studio Add-in Developer

The following License Options apply: Authorized Users (Workstation) License or User License (Authorized Users). User License (Authorized Users) License is equivalent to Desktop License.

Authorized User (Workstation) License is equivalent to Desktop License.

Reflection Desktop with Extra! as Authorized Alternative Host Print Server

The following License Options apply: Server License.

Licensee may configure and run a maximum of ten printer emulation sessions per license acquired. Licensee must also acquire corresponding Reflection Desktop with Extra! Middleware as Authorized Alternative Host Print Server Client Access licenses to print host print jobs from any non-Rocket Software terminal emulator to the printer emulation sessions managed by the Reflection Desktop with Extra! as Authorized Alternative Host Print Server.

Reflection Desktop with Extra! as Authorized Alternative Host Print Server Client Access

The following License Options apply: Desktop License.

Licensee must acquire a license for each device running a non-Rocket Software terminal emulator in order to print host print jobs to the Reflection Desktop with Extra! as Authorized Alternative Host Print Server.

Reflection Desktop with Extra! as Authorized Alternative Middleware

The following License Options apply: Server License.

Licensee must acquire a license for this product and the related Client Access product in order to be used in a middleware capacity, providing automated, unattended communications and/or services to other applications or devices, where the product is installed on a server and used to automate the exchange of data with a host and this data is then shared with users or other applications.

Reflection Desktop with Extra! as Authorized Alternative Middleware Client Access

The following License Options apply: Desktop License, Named User License, Concurrent User License.

Licensee must acquire the appropriate Client Access license for devices and/or users to access or interact with the host data generated by the application that is using “Reflection Desktop with Extra! as Authorized Alternative Middleware” as a middleware server.

Reflection Desktop; Reflection Desktop for IBM; Reflection Desktop for UNIX and OpenVMS; Reflection Desktop for X; Reflection Desktop Limited to RHP/NSVT; Reflection Desktop Pro; Reflection Desktop with Extra! as Authorized Alternative; Reflection for Secure IT Client for Windows

The following License Options apply: Desktop License, Named User License, Concurrent User License, or Robotic Process Automation License.

Licensee may deploy the Domain Control Components to Servers and Devices as appropriate to Licensee’s operating environment, for the sole purpose of supporting the Licensed Software, and such deployment will not consume license count.

PKI Manager is intended to support operation of the Licensed Software as a Distributed

Application. Licensee may deploy the PKI Manager to Servers and Devices as appropriate to Licensee's operating environment, for the sole purpose of supporting (i) the Licensed Software and/or (ii) any other Rocket Software product having its own PKI Manager entitlement, and such deployment will not consume license count.

Reflection Desktop for NonStop Add-On

The following License Options apply: Desktop License, Named User License, or Concurrent User License.

A License for the applicable Add-On Software is required in a quantity corresponding to the number of Licenses for the applicable Prerequisite Product and must be of the same License Option. Licensee may deploy Add-On Software according to License Option as one application with one license of the Prerequisite Product. Licensee must validate version compatibility of Add-On Software and coordinate the installation of updates to the Add-On Software and to the Prerequisite Products to maintain compatibility.

**Reflection for IBM; Reflection for UNIX and OpenVMS;
Reflection for HP; Reflection for the Multi- Host Enterprise
Standard Edition, Reflection for the Multi-Host Enterprise
Professional Edition; Reflection X; Reflection Suite for X**

The following License Options apply: Desktop License.

Reflection for Secure IT Client for UNIX

The following License Options apply: Desktop License.

PKI Manager is intended to support operation of the Licensed Software as a Distributed Application. Licensee may deploy the PKI Manager to Servers and Devices as appropriate to Licensee's operating environment, for the sole purpose of supporting (i) the Licensed Software and/or (ii) any other Rocket Software product having its own PKI Manager entitlement, and such deployment will not consume license count.

Reflection for Secure IT Gateway

The following License Options apply: Server License.

Reflection for Secure IT Gateway includes the following components: Reflection Secure Shell Proxy, Reflection Transfer Server, Reflection Gateway Administrator, Reflection for Secure IT Server for Windows, and Reflection Hub (“Reflection Component”):

With each license of Reflection for Secure IT Gateway Software, Licensee may install and use a single copy of each Reflection Component.

Reflection for Secure IT Server for Windows; Reflection for Secure IT Server for UNIX

The following License Options apply: Server License.

A Reflection for Secure IT Server for UNIX License includes the right to install and use, on the same Device or Server, a single copy of the Reflection for Secure IT Client for UNIX component that accompanies the Reflection for Secure IT Server for UNIX product.

If Licensee’s operating system environment supports a partitioning model such as Solaris Zones, Solaris Containers, or IBM’s LPAR, in which a partition exists solely to manage other partitions, Licensee may install a copy of the Licensed Software on such partition, and such copy does not consume a License.

PKI Manager is intended to support operation of the Licensed Software as a Distributed Application. Licensee may deploy the PKI Manager to Servers and Devices as appropriate to Licensee’s operating environment, for the sole purpose of supporting (i) the Licensed Software and/or (ii) any other Rocket Software product having its own PKI Manager entitlement, and such deployment will not consume license count.

Reflection for the Web Airlines Edition with Printing; Reflection for the Web Enterprise Edition; Reflection for the Web Unisys Edition

The following License Options apply: User License, Named User License, Desktop License,

Reflection for the Web includes the following components: server components and administrative tools for the deployment and operation of the Licensed Software; a variety of server-based and downloadable components made available to end-user client devices to enable host access; a SDK component (“RWeb SDK”) for the extension of host-access functionalities

Reflection for the Web server components are licensed for use only in conjunction with Rocket Software products. Reflection for the Web administrative functions cannot be used to provide management capabilities for Extra!, Rumba, Reflection, or InfoConnect products.

A User License is equivalent to a Named User License.

RWeb SDK: Licensee may use the RWeb SDK component and/or other facilities in the Software to create applications and/or to otherwise extend the host-access functionalities. Any such application or extension shall be deemed part of the Licensed Software.

Operation of the Licensed Software as Middleware, as part of a Robotic Process Automation environment, or as a Print Server is prohibited.

Rumba (all variants); Rumba+ (all variants)

The following License Options apply: Server License (Processor Based), Authorized User (Workstation), User License (Authorized Users), Server License (Concurrent Users), or Per Server License.

In the event the applicable Product Order specifies a type of host system (e.g., Mainframe, UNIX, AS/400), Licensee may connect the Licensed Software only to host systems that are the same as the type specified.

Licensee may not transfer, ship or use the Licensed Software outside the continent in which it was originally licensed to Licensee without first paying Licensor any applicable additional fees required by Licensor. For purposes of the foregoing, “continent” shall mean North America, South America, Europe, Africa, Asia, Australia, or Antarctica.

Authorized User (Workstation) License is equivalent to Desktop License. User License (Authorized Users) License is equivalent to Desktop License.

Server License (Concurrent Users) License is equivalent to Concurrent User License. Per Server License is equivalent to Server License.

Secure Host Access Pro; Secure Host Access Enterprise; Secure Host Access Anywhere and Secure Host Access Web Only

The following License Options apply: Desktop License, Named User License, Concurrent User License

Secure Host Access includes the following components: Server components and administrative tools for the deployment and operation of the Licensed Software. The licensee can deploy as many of the server components as needed to support the quantity of their licensed option.

Operation of the Licensed Software as part of a Robotic Process Automation environment is prohibited without the Host Access Robotic Process Automation Add-On.

Operation of the Licensed Software in middleware or host print server scenarios is authorized only with a Secure Host Access Anywhere license.

Secure Host Access Unisys Add-On; Secure Host Access Airlines Add-On; Secure Host Access Robotic Process Automation Add-On and Secure Host Access Non-Stop Add-On

The following License Options apply: Desktop License, Named User License, Concurrent User License, Robotic Process Automation License

A License for the applicable Add-On Software is required in a quantity corresponding to the number of Licenses for the applicable Prerequisite Product and must be of the same License Option. The licensee may deploy Add-On Software according to the License Option as one application with one license of the Prerequisite Product. The licensee must validate the version compatibility of Add-On Software and coordinate the installation of updates to the Add-On Software and to the Prerequisite Products to maintain compatibility.

ViewNow (all variants)

The following License Options apply: Authorized User (Workstation), User License (Authorized Users), or Server License (Concurrent Users).

Authorized User (Workstation) License is equivalent to Desktop License. User License (Authorized Users) License is equivalent to Desktop License.

Server License (Concurrent Users) License is equivalent to Concurrent User License.

Verastream Bridge Integrator

The following License Options apply: Server License or Region Adapter (see below).

Definitions:

“VBI” means the Verastream Bridge Integrator product.

“Runtime Service Region” means any CICS® region containing any data engine component of the Software. “Other CICS Region” means any CICS region not containing a data engine component of the Software, but configured to interoperate with one or more Runtime Service Region(s).

“Application” means a software application developed by Licensee using the Software.

“Region Adapter” means a License to interoperate with an Other CICS Region.

Licensee is entitled to install and use one Runtime Server Region per Server License. Each Runtime Server Region installation is permitted to interoperate with other Runtime Service Regions or Other CICS Regions up to number of Region Adapters licensed separately.

The Server License and Region Adapter license types include subtypes for Test and Development usage. The Test subtype permits installation on test Devices only, and the Development subtype permits installation on development (non- production) Devices only.

Licensee is entitled to install and use a reasonable number of copies of the included Reflection for Secure IT component for the sole purpose of managing the security of the connection between middle-tier VBI components and licensed regions.

Licensee is entitled to install and use one copy of the included Verastream Process Designer (VPD) components (1 VPD Development Kit and 1 VPD Server) per Server License purchased.

Licensee may develop, install, and use Applications provided such Applications are used solely in conjunction with Runtime Service Region(s). Licensee may allow third parties to access and use the Applications, on any terms no less restrictive than those herein, provided that the Applications are deployed on equipment owned by Licensee.

Verastream Host Integrator Server Kit

The following License Options apply: Server License together with one of: a Host Session License, a Named User License, or a Concurrent User License.

The Host Session License type allows the VHI Server Kit to be accessed by any number of Users. The Named User and Concurrent User License types allow the VHI Server Kit to be accessed by a specific number of Named or Concurrent Users and do not limit the number of Host Connections that can be configured and used.

Verastream Host Integrator Server Kit includes the following components (“Management and Administrative Components”):

- Management Server
- Administrative Console
- VMR Log Viewer
- Client Connectors

Management and Administrative Components may be installed on one or more Servers or Devices and do not consume a license.

Verastream Host Integrator Development Kit

The following License Options apply: Desktop License.

Verastream Host Integrator Development Kit may be used only for development purposes.

Verastream SDK for Unisys and Airlines

The following License Options apply: Server License.

“Object” means any of the following platform/protocol combinations enabled by the Licensed Software: ALC/Airgate Object; ALC/Apollo/Galileo Object; ALC/EDS SHARES Object; ALC/Lantern Gateway Object; ALC/MATIP Object; ALC/Sabre Object; UTS/Airgate Object; UTS/INT-1 Object; UTS/MATIP Object; UTS/PEPgate Object; T27/TCPA Object; 3270/TN Object; 5250/TN Object; VT/Telnet Object.

“Application” means an application developed using the Licensed Software.

“Runtime Service” means one instance of the runtime components of the Licensed Software using any one (and only one) Object.

For the number of Licensed Units of the Licensed Software, Licensee may install and use up to the same number of Runtime Service(s). Additionally, Licensee may create, install and use Applications subject to the terms below and herein. Licensee may install and use a reasonable number of copies of the Licensed Software on developer workstations for the sole purpose of developing Applications.

Licensee may use the Licensed Software to develop Applications for internal use, and Licensee may manipulate and incorporate components of the Licensed Software with Licensee’s Applications provided that Licensee preserves in each Application the copyright notices and/or digital signatures (if any) accompanying each such incorporated component.

Licensee may use Applications only in conjunction with licensed Runtime Services.

Applications which use the Licensed Software in the development process, but which do not incorporate any component of the Licensed Software, do not consume license count. Licensee may deploy any number of Applications or instances of Applications.

Notwithstanding any terms to the contrary in this License Agreement, Licensee may allow third parties to access and use Licensee Applications which are operating in conjunction with Licensee licensed Runtime Services on Licensee equipment. However, Licensee is not authorized to distribute to a third party any Application unless Licensee has obtained a corresponding distribution license under a separate written agreement with Licensor.

The following License Options apply: Server License.

“Runtime Service” means one instance of the runtime components of the Licensed Software.

Licensee must purchase a license for each Runtime Service. A single license cannot be used to run multiple Runtime Services concurrently.

Host Connectivity Suite offerings

Suite	Offering includes	Additional terms (if any)
Developer Kit	- OnWeb Server - Rumba+ - Web-to-Host Java - Web-to-Host Pro	Developer Kit is licensed by an Authorized User (Workstation) License or a User License (Authorized Users), which are equivalent to a Desktop License.
Host Access for RPA	- Extra! X-treme - Reflection Desktop - Rumba+ Desktop - Verastream Host Integrator Server Kit - Verastream Host Integrator Development Kit	- Host Access for RPA is licensed by a Robotic Process Automation License. - For each license acquired, Licensee may deploy one product in the suite and installation or usage of any product consumes a license. For example, if Licensee were to install both Rumba and Reflection, two licenses would be required. - Licensee is entitled to install and use 1 Verastream Host Integrator Server Kit component per Host Access for RPA license purchased. - Licensee is entitled to install and use 1 Verastream Host Integrator Development Kit per Host Access for RPA license purchased. - Licensee is entitled to use 1 Verastream Host Integrator Host Connection per Host Access for RPA license purchased. Example: Licensee that has purchased 10 Robotic Process Automation Licenses, is entitled to utilize Verastream Host Integrator to run 10 Host Connections concurrently to provide services for Bots. - Licensee may use Verastream Host Integrator Server Kit solely for the purpose of providing the Unattended Services necessary for the Bot to perform tasks with an RPA Program and is not intended for non-RPA scenarios, such as providing services for web and mobile applications.

Host Access Management and Security Server - Advanced Authentication Add-On Bundle	- Host Access Management and Security Server - Advanced Authentication (MSS) Add-On - Advanced Authentication - Advanced Authentication Clients	One User license for both Advanced Authentication and Advanced Authentication Clients are included for each license of the Bundle (whether Desktop, Named User, or Concurrent User) and are subject to the ALA for Identity and Access Management Products.
Reflection Enterprise Suite	- Reflection Desktop - Reflection for Web (RWeb) Enterprise Edition	- Reflection Enterprise Suite is licensed by either a Desktop license or a Named User license or a Concurrent User license. - For each license acquired, Licensee may deploy the entire suite of components, or any subset of the suite of components, in accordance with the License Option. - For each 10,000 Desktop or Named User licenses or for each 3,000 Concurrent User licenses, Licensee is entitled to install and use 3 RWeb Server licenses to manage RWeb client licenses. In addition to these Servers, for high availability and failover purposes only, Licensee is entitled to install and use 3 RWeb Server licenses.
Rumba Bundle	- Rumba - Rumba FTP - ViewNowX	Rumba Bundle is licensed by Server License (Processor Based), Authorized User (Workstation) or User License (Authorized Users) which are both equivalent to Desktop License, Server License (Concurrent Users) which is equivalent to Concurrent User License, or Per Server License which is equivalent to Server License.
Rumba Enterprise Edition	- Rumba - Rumba FTP - ViewNowX - Web-to-Host	Rumba Bundle is licensed by Server License (Processor Based), Authorized User (Workstation) or User License (Authorized Users) which are both equivalent to Desktop License, Server License (Concurrent Users) which is equivalent to Concurrent User License, or Per Server License which is equivalent to Server License.
Rumba+ Ultimate	- Rumba+ - Rumba FTP - Rumba+ Mobile - Rumba+ Web - ViewNowX - Web-to-Host	Rumba+ Ultimate is licensed by Server License (Processor Based), Authorized User (Workstation) or User License (Authorized Users) which are both equivalent to Desktop License, Server License (Concurrent Users) which is equivalent to Concurrent User License, or Per Server License which is equivalent to Server License.

Additional License Terms

Term

- A. Authorized Alternatives/Back-grade Rights: For certain products, Rocket Software offers back-grade rights to legacy ("Authorized Alternative") products, which are older products that have been superseded by another product. In the event that Licensee has purchased new licenses of a product or updated existing licenses to a product, and if Licensee already possesses valid license entitlement to such Authorized Alternative, Rocket Software allows Licensee to keep the Authorized Alternative product deployed and utilize its licenses for the Authorized Alternative in place of its licenses for the newer, superseding product. This can be in whole or in part. For example, if Licensee owns 100 Desktop licenses of Extra! X-treme and updates these licenses to Secure Host Access Pro, it may choose to keep the 100 licenses of Extra! X-treme deployed, or Licensee may choose to deploy 50 licenses of Extra! X-treme and 50 licenses of Secure Host Access Pro or any other combination that totals no more than 100 licenses owned and deployed. An Authorized Alternative is both product- and version-specific and is subject to change at any time at Rocket Software's sole discretion. Authorized Alternative products are governed by the license terms that originally applied to such Authorized Alternative when obtained by Licensee. In the case of a Suite product that contains multiple component products, the terms noted above also apply to suite component products.
- B. Licensee shall install and use the Licensed Software as authorized in the Applicable Agreement only as a complete product and may not use portions of such software on a standalone basis separate from the complete software unless expressly authorized in the product documentation, specifications, or an applicable agreement.
